Education

- **Private Higher School of Engineering and Technologies (ESPRIT)** *2024 – 2027*
  Software Engineering First-year score: 16.31/20
- **Higher Institute of Information and Communication Technologies (ISTIC)** *2021 – 2024*
  Software Engineering and Information Systems Score: 19/20, Highest Honors

Experience

- **Enda Tamweel** *June 2025 – August 2025*
  Full-Stack & DevOps Intern | React Native, Spring Boot, CI/CD Tunis – North Urban Center
  - Self-hosted a GitLab runner and built a CI/CD pipeline with build, test, and SonarQube quality gates for Spring Boot
  - Delivered **Prospecti**: a React Native (Expo) mobile app and Spring Boot backend that automate prospect capture and route optimisation for portfolio managers
  - Integrated OpenRouteService geospatial APIs for routing and distance calculations
  - **Technologies**: React Native, Spring Boot, MySQL, Docker, GitLab CI/CD, SonarQube

- **Attijari Bank** *February 2024 – May 2024*
  Mobile Development Intern | React Native & Spring Boot Tunis – North Urban Center
  - Developed an accessible mobile app with **React Native** and **Spring Boot** following WCAG standards — usability tests with visually impaired users showed a **20% improvement in accessibility scores**
  - Trained a **BERT**-based virtual assistant for intent recognition, reaching **85% accuracy**, and deployed it via a **Flask API**
  - Built an admin dashboard in **React** to manage client requests and claims
  - Ran usability sessions with the *Ibsar Association* and visually impaired users to validate accessibility decisions
  - **Technologies**: React Native, React, Spring Boot, PostgreSQL, Docker, Flask, BERT

- **Attijari Bank** *June 2023 – August 2023*
  Full-Stack Web Development Intern | MERN, WebSockets Tunis – North Urban Center
  - Created analytics dashboards with React.js and Nivo for visualising user engagement metrics
  - Implemented JWT authentication with role-based access control (RBAC)
  - Added a real-time team chat using **Socket.io**
  - **Technologies**: MERN (MongoDB, ExpressJS, ReactJS, Node.js)

Technical Projects

- **Private Cloud & Microservices Platform** *2025 – Present*
  OpenStack | Kubernetes | Docker | Helm | Ansible | Prometheus | Grafana | Linux
  - Provisioned a 7-node **OpenStack** cluster from scratch (1 controller, 5 compute, 1 storage); configured network topology, tenant isolation, and Cinder block storage
  - Bootstrapped a **Kubernetes** cluster on top of OpenStack instances; configured Cinder CSI for persistent volumes and NGINX Ingress for routing
  - Containerised a set of microservices and deployed them via **Helm** charts with rolling updates and health probes
  - Set up **Prometheus** and **Grafana** for cluster monitoring and alerting
  - Wrote Bash scripts and **Ansible** playbooks to automate node provisioning and configuration

Technical Skills and Interests

Cloud & Infra: OpenStack, Docker, Kubernetes, Helm, Terraform
OS & Systems: Linux (Bash, systemd, networking), Ubuntu Server
DevOps: GitLab CI/CD, GitHub Actions, SonarQube, Ansible
Observability: Prometheus, Grafana
Databases: MySQL, PostgreSQL, MongoDB
Frameworks: Spring Boot, ReactJS, NextJS, NodeJS, React Native
Languages: French (native), Arabic (native), English (fluent), Spanish (intermediate), German (basic)

Certifications & Achievements

- ***Machine Learning for Data Science Projects*** *July 11, 2024*
- ***Mastery Award in Big Data Engineering*** *December 20, 2023*
