Education

- **Private Higher School of Engineering and Technologies (ESPRIT)** *2024 - 2027*
  Software engineering First-year score: 16.31/20
- **Higher Institute of Information and Communication Technologies (ISTIC)** *2021 - 2024*
  Software Engineering and Information Systems Score: 19/20, Highest Honors

Experience

- **Enda Tamweel** *June 2025 - August 2025*
  Full-Stack & DevOps Intern | React Native, Spring Boot, AWS, CI/CD Tunis - North Urban Center
  - Led development of **Prospecti**: a React Native (Expo) mobile app and Spring Boot REST API that automate prospect capture and route optimisation for agents.
  - Added push (Firebase FCM) & SMS (Infobip) notifications.
  - Built a Gitlab CI/CD pipeline.
  - Integrated OpenRouteService geospatial APIs.
  - **Technologies**: React Native, Spring Boot, MySQL, Docker, Gitlab CI/CD, SonarQube.

- **Attijari Bank** *February 2024 - May 2024*
  Mobile Development Intern | React Native & Spring Boot Tunis - North Urban Center
  - Designed an accessible mobile application with **React Native** and **Spring Boot**, following the conventions established by WCAG, resulting in a **20% increase in user accessibility scores** during user testing.
  - Engineered an **AI-driven** virtual assistant using **BERT**, optimizing **natural language understanding (NLU)** and achieving 85% accuracy in **intent recognition**, enhancing user interaction efficiency. Deployed the model via a **Flask API**, enabling a seamless integration into the mobile application.
  - Developed an administration interface with **React** and **Spring Boot** to manage client requests and claims efficiently.
  - Collaborated with the *Ibsar Association* for insights into developing an accessible application and conducting **usability testing** with a visually impaired user.
  - Adopted the **Scrum project management methodology** and used Notion for efficient work.
  - **Technologies**: React Native, React, Machine Learning, Docker, Spring Boot, and PostgreSQL.
  - **End-of-studies project.**

- **Attijari Bank** *June 2023 - August 2023*
  Full-Stack Web Development Intern | MongoDB, ExpressJS, ReactJS, Node.js; WebSockets Tunis - North Urban Center
  - Developed interactive dashboards using React.js and Nivo, enabling dynamic visualization of user engagement metrics and improving the clarity of user analytics.
  - Implemented secure authentication & authorization using **JWT**, ensuring controlled access based on **role-based access control (RBAC)**.
  - Integrated a real-time chat system using **WebSockets**, improving communication between team members.
  - **Technologies**: MERN (MongoDB, ExpressJS, ReactJS, Node.js) stack.
  - **Summer internship completed.**

Technical Projects

- **INCLUSA** *February, 2024*
  JavaFX | Symfony | MySQL | REST APIs | RBAC | Agile | Accessibility
  - Developed a web and desktop **e-learning platform** for individuals with hearing impairments, integrating features to enhance communication and learning accessibility.
  - **Technologies**: JavaFX, Symfony, CSS, AI/ML, MySQL, REST APIs, RBAC.

Technical Skills and Interests

Languages: English, Arabic, French, Spanish and German.
DevOps: Docker, Git, CI/CD Pipelines, AWS, Linux.
Database: MySQL, PostgreSQL, MongoDB.
Libraries/Frameworks: Spring Boot, ReactJS, NextJS, NodeJS.

Achievements

- **Machine Learning for Data Science Projects** *July 11, 2024*
- **Mastery Award in Big Data Engineering** *December 20, 2023*
